

# 14' ROTARY FINISHING MOWER

[TRACKLESSVEHICLES.COM](http://TRACKLESSVEHICLES.COM)

## YOUR MOWING SOLUTION.

The Rotary Finishing Mower was designed to drastically reduce mowing time in large areas such as campuses and parks. The three-section, front-mounted Mower provides the flexibility required to avoid scalping on undulating ground.

The Mower's 72" main deck is powered by the tractor's PTO, while the two hinged 48" wings are powered independently by the tractor's hydraulics. Safety switches shut off the wings automatically when raised. The Mower's cutting height ranges from 1½" to 4" and can be adjusted in ½" increments.
